## K-12 & SCHOOL CHOICE SURVEY

### What Do Voters Say About K-12 Education?

---

Polling Paper No. 4  
December 8, 2011

*With questions on state performance, education spending, charter schools, virtual schools, tax-credit scholarships, education savings accounts, and school vouchers*

<b>Title:</b>	New Mexico K-12 & School Choice Survey
<b>Survey Organization:</b>	Braun Research Incorporated (BRI)
<b>Sponsor:</b>	The Friedman Foundation for Educational Choice
<b>Interview Dates:</b>	September 12 to 18, 2011
<b>Interview Method:</b>	Live Telephone   65% landline and 35% cell phone
<b>Avg Interview Length:</b>	10 minutes (approx.)
<b>Language(s):</b>	English, Spanish
<b>Sample Frame:</b>	Registered Voters
<b>Sampling Method:</b>	Dual Frame; Probability Sampling; Random Digit Dial (RDD)
<b>Sample Size:</b>	NEW MEXICO=808
<b>Split Sample Sizes:</b>	“Split A”=388; “Split B”=420
<b>Margin of Error:</b>	± 3.5 percentage points for the statewide sample ± 5.0 percentage points for “Split A” sample ± 4.8 percentage points for “Split B” sample
<b>Weighting?</b>	Yes (Gender, Race, Age, Education Level, Hispanic Origin, County)
<b>Oversampling?</b>	No

8. Frank Johnson, Lei Zhou, and Nanae Nakamoto, *Revenues and Expenditures for Public Elementary and Secondary Education: School Year 2008–09 (Fiscal Year 2009)* (NCES 2011-329). U.S. Department of Education. Washington, D.C.: National Center for Education Statistics (June 2011).  
URL: [nces.ed.gov/pubs2011/2011329.pdf](http://nces.ed.gov/pubs2011/2011329.pdf)  
“Current Expenditures” data include dollars spent on instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on long-term debt service, facilities and construction, and other programs.

## Overview

The “New Mexico K-12 & School Choice Survey” project, commissioned by The Friedman Foundation for Educational Choice and conducted by Braun Research Incorporated (BRI), measures New Mexico voters’ familiarity and views on a range of K-12 education issues and school choice reforms. We report response *levels* and *differences* (we use the term “net score” or “net”) of voter opinion, and the *intensity* of responses. Where do the voters stand on important issues and policy proposals in K-12 education? We provide some observations and insights in the following pages of this paper.

A randomly selected and statistically representative sample of New Mexico’s registered voters recently responded to 17 substantive questions and 11 demographic questions (see pages 46 – 75). The next section summarizes our key findings.

A total of 808 telephone interviews were conducted in English or Spanish from September 12 – 18, 2011, by means of both landline and cell phone. Statistical results were weighted to correct for known demographic discrepancies. The margin of sampling error for the total sample of interviews is  $\pm 3.5$  percentage points.

In this project we included two split-sample experiments. A split sample design is a systematic way of comparing the effects of two or more alternative wordings for a given question. The purpose is to see if particular wording, or providing a new piece of information, can significantly influence opinion on a given topic.

This polling paper has four sections. The first section summarizes key findings. We call the second section “Survey Snapshots,” which offers charts illustrating the core findings of the survey. The third section describes the survey’s methodology, summarizes response statistics, and presents additional technical information on call dispositions for landline and cell phone interviews. The fourth section presents our questionnaire and results (“topline numbers”), essentially allowing the reader to follow the actual interview as it was conducted, with respect to question wording and ordering. We have set out to

give a straight-forward analysis, going light on editorial commentary, and letting the charts and numbers communicate the major findings.

## Key Findings

- ▶ **The vast majority of New Mexico’s voters (78%) are paying attention to issues in K-12 education. Only 21% of voters say they pay no attention.**

*See Question 1*

In the state, those who say they pay “a lot” of attention to K-12 education issues outnumber those who say they pay no attention by a 4-to-1 ratio.

- ▶ **New Mexico voters are more likely to think that K-12 education is on the “wrong track” (52%) compared to heading in the “right direction” (34%).**

*See Question 2*

However, the views of demographic groups vary. Considering the right direction-wrong track net scores, there is a range of opinion from very negative to mildly positive. Those voters who are generally down on the direction of K-12 education in New Mexico live in rural or urban areas, consider themselves Republicans or Independents, fall in the 50 & Over age group, or have household earnings greater than/equal to \$50,000. The more divided subgroups include Democrats, age group 30-49, households earning less than \$50,000, and Hispanics.

- ▶ **Nearly two out of three New Mexico voters give the state’s public school system sub-par ratings (32% say “good” or “excellent”; 65% say “fair” or “poor”).**

*See Question 3*

Demographic groups across the board give negative ratings. Voters who live in rural areas, identify themselves as Republican, and earn at least \$50,000 view the state's system of public schools as overwhelmingly "fair" or "poor."

Suburbanites, lower-income households, and African Americans give the state's K-12 system low marks, but represent those groups that are least negative.

- ▶ **Generally speaking, New Mexico voters have little idea how much is spent in the public schools. There is a substantial information gap.**

*See Question 4*

Just one out of 10 respondents (13%) could estimate the correct per-student spending range in New Mexico. The state spends more than \$9,500 for each student in the public schools, but nearly a third of those interviewed (31%) thought that the state spent less than \$4,000 per student. This is a pattern we have seen in our other state surveys. Typically, just one out of 10 people in a given state will know (or guess) the correct range of public spending on K-12 education.

Voters tend to be way off the mark on estimating public school spending.

Policymakers should be cautious to pander to populist impulses for increases in school funding. Compared with responses given to Question 4, better-informed voters could have very different reactions to proposals for increased education funding. This is what we see in a follow-up split-sample experiment.

- ▶ **When given the latest per-student spending information, voters are more likely to say public school funding is at a level that is "about right" or "too high" compared to answering without having such information.**

*See Questions 5A and 5B*

We asked two slightly different questions about the level of public school funding in New Mexico. On version 5A, 62% of voters said that public school funding is "too low." However on version 5B, which included a sentence offering the most

recent data on per-student funding in New Mexico (\$9,648 in 2009), the proportion of voters saying “too low” shrank by 21 percentage points – effectively a 34% reduction.

Again comparing the split-sample questions, respondents answering version 5B and having the funding information were more likely to say the level of public school funding is “about right” (37% vs. 22%) or “too high” (17% vs. 8%). It looks as if New Mexico voters are likely to change their views on public school funding if given accurate per-student spending information. The implication that opinion can turn on a single piece of data is important for political sound bites that focus on the levels of public spending rather than how the money is allocated or spent.

- ▶ **When asked for a preferred school type, New Mexico voters show a major disconnect between their preferred school types and actual enrollment patterns.**

*See Question 6*

About 5% of New Mexico’s K-12 student population attend private schools, but in our survey interviews, more than one-third of voters (36%) would select a private school as a first option. Approximately 92% of the state’s students attend regular public schools, but a much lower percentage of voters (37%) would choose a regular public school as their first choice. Roughly 3% of the student population is attending charter schools, but 15% of New Mexico voters would like to send their child to a charter school. The results suggest the capability to choose a desired school type is highly constrained in New Mexico.

- ▶ **Nearly one out of five voters in our survey prioritize a “better/quality education” as the key attribute they are looking for in the selection of a school. The second most important attribute, as suggested by 15% of all voters, is “individual/one-on-one attention.”**

*See Question 7*

Often discussed school characteristics such as teachers or teaching (9%), class size (8%), diversity (2%), discipline (2%), and safety (2%) are all less likely to be a first priority for New Mexico voters. That said, any of these qualities may or may not garner more urgency as a second or third priority, which we do not explore in our survey.

- ▶ **New Mexico voters are much more likely to favor charter schools (72%) rather than oppose such schools (11%).**

*See Questions 8 and 9*

New Mexico registered a very large positive net score (+53 net) supporting charter schools. The intensity of this support is also very strongly positive (+23 intensity). Charter schools clearly resonate with New Mexico voters.

In the future, there may be opportunity to grow support for charters. The level of familiarity with charters (44%) is moderate, and it actually may understate the potential voter support if a “charter school” is better understood. The association between charter school familiarity and favorability is positive in direction and moderate in size (Q9:  $r=.163, p < .01$ ).

- ▶ **The jury is still out on virtual schools. As defined in the survey, New Mexico voters generally oppose the idea of virtual schools. Half of all respondents (50%) oppose virtual schools compared to those who say they favor them (38%) as a school option.**

*See Questions 10 and 11*

Intensity is mildly negative on virtual schools at this time. The strongly held negative views exceed the strongly positive views (-11 intensity). This is pretty understandable because the virtual school is a relatively new policy idea.

In terms of net scores, several demographic groups stand out in their views on virtual schools. Urban voters are more likely to support this kind of school type

compared with suburban, small town, and rural voters. Republicans are more likely than Democrats and Independents to favor virtual schools. Middle-age voters (age 30-49) represent one of the few groups who support virtual schools. Younger (age 18-29) and older (age 50 & over) voters are much more skeptical and negative.

Like charter schools, there is potential to grow support for virtual schools. Right now, relatively few people in New Mexico (38%) say they are familiar with virtual schools. The association between virtual school familiarity and favorability is positive in direction and modest in size ( $r=.156, p < .01$ ).

- ▶ **In a split-sample experiment, we asked two slightly different questions about tax-credit scholarships. At least 62% (and as much as 71%) of voters say they favor such a system, compared with 25% (and as little as 17%) who say they oppose.**

*See Questions 12A and 12B*

The two versions of this question did generate differences in terms of favor-oppose net scores, shifting opinion by about 8 or 9 percentage points one direction or the other. It appears that giving a short definition for “tax credit,” and including clarifying language about the school selection process, generates some change in opinion.

Respondents to Question 12A were much more likely to be “strongly” favorable toward tax-credit scholarships, than “strongly” opposed – the intensity score was +8 percentage points. However, in the alternate Question 12B, the inserted definition for “tax credit” and/or further description of a “tax-credit scholarship system” cut in half the strong negative reactions.

In either case, the bottom line is the same – New Mexico like the idea of having a tax-credit scholarship system for the state.

- ▶ **Voters overwhelmingly support a tax-credit scholarship system for special-needs students (78% favor vs. 15% oppose).**

*See Question 13*

It is clear that New Mexico voters see value in creating tax-credit scholarships for special-needs students. The net score is huge (+63 net) and the intensity of support is great (+42 intensity). All demographic groups we measures are likely to support this kind of public policy. Support is most likely among Independents, younger voters (age 18-29 and age 30-49), and those earning less than \$75,000.

- ▶ **New Mexico voters support an “education savings account” system (also called “ESA”). The percentage of those who favor the policy (56%) is much larger than the proportion who say they oppose (34%).**

*See Question 14*

New Mexico registered a large positive net score (+22) supporting ESAs. The enthusiasm behind this support is also positive (+10 intensity).

- ▶ **New Mexico voters say they are supportive of school vouchers.**

*See Questions 15 – 17*

More than twice as many voters say they favor a school voucher system (62%) than oppose the idea (30%). The large net score (+32) indicates New Mexico voters are much more likely to support such a policy. The intensity score (+15) is larger than what we observe for ESAs, but considerably smaller than what we measure for tax-credit scholarship questions.

Most demographic groups considered for this paper register supportive views on school vouchers, dipping below 54% favorable for just one group – age group 50 & Over. We do detect some subtle differences in terms of net favorability and intensity. Urban, suburban, and rural voters are more likely to support school

vouchers than small town voters. Intensity is greatest in the suburbs. Republicans are twice as likely as Democrats to support school vouchers. Republicans and Independents are much more passionate about school vouchers than Democrats. There is a big disconnect between younger and older voters. Those in the age groups 18-29 and 30-49 are much more likely than older voters (50 & Over) to support school vouchers. Younger voters are also much more passionate about the issue. Republicans are more likely to support school vouchers than Democrats, and both Republicans and Independents are more intensely positive in support. One income bracket (\$75,000 - \$124,999) stands out from the others, having a fairly neutral and dispassionate view of school vouchers. Latinos and African Americans are more likely to support school vouchers than Whites.

More than six out of 10 New Mexico voters say they are either “Not that Familiar” with or “Never Heard of/Don’t Know” about school vouchers. However, it doesn’t look as if familiarity is associated with favorability/opposition to school vouchers. The association between familiarity and favorability/opposition is not significant, and the correlation is essentially zero ( $r = -.007$ ,  $p = .848$ ).

In a follow-up question, we asked for the reason why a respondent chose his/her view regarding school vouchers. The term “choice” is overwhelmingly the keyword when it comes to vouchers. Approximately one out of four respondents (24%) offered “choice” as a reason. Other positive reasons include “better/quality education” (9%) and “helps less fortunate” (6%). The most cited negative responses include “abuse/misuse of voucher” (5%) and “hurts public schools” (5%).

## Methods Summary

The “K-12 & School Choice Survey ” project, commissioned by The Friedman Foundation for Educational Choice and conducted by Braun Research Incorporated (BRI), interviewed registered voters in New Mexico. A total of **808** telephone interviews were conducted in English and Spanish from September 12 – 18, 2011, by means of both landline and cell phone. Statistical results were weighted to correct known demographic discrepancies. The margin of sampling error for the total sample of interviews is  $\pm 3.5$  percentage points.

BRI’s live callers conducted all phone interviews. For this entire project, a total of **7,906** calls were made in New Mexico. Of these calls **1,958** were unusable phone numbers (disconnected, fax, busy, non-residential, or non-answers, etc.); **3,816** were usable numbers but eligibility unknown (including refusals and voicemail); **202** cell phone numbers were usable but not eligible for this survey; **80** people did not complete the survey. The average response rate of the landline interviews was **17.3%**. The average response rate of the cell phone interviews was **20.3%**.

Details on each state’s sample dispositions, landline, and cell phone response rates, and weighting are discussed in following sections.

### *Sample Design*

A combination of landline and cellular random digit dial (RDD) samples was used to represent registered voters in New Mexico who have access to either a landline or cellular telephone. Both samples were provided by Survey Sampling International, LLC (SSI) according to BRI specifications.

SSI starts with a database of all listed telephone numbers, updated on a four- to six-week rolling basis, 25 percent of the listings at a time. All active blocks—contiguous groups of 100 phone numbers for which more than one residential number is listed—are added to this database. Blocks and exchanges that include only listed business numbers are excluded.

Numbers for the landline sample were drawn with equal probabilities from active blocks (area code + exchange + two-digit block number) that contained three or more residential directory listings. The cellular sample was not list-assisted, but was drawn through a systematic sampling from dedicated wireless 100-blocks and shared service 100-blocks with no directory-listed landline numbers.

### ***Contact Procedures***

Interviews were conducted from September 12 – 18, 2011. As many as eight attempts were made to contact every sampled telephone number. The sample was released for interviewing in replicates, which are representative subsamples of the larger sample. Using replicates to control the release of the sample ensures that complete call procedures are followed for the entire sample. Calls were staggered over times of day and days of the week to maximize the chance of making contact with potential respondents. Each phone number received at least one daytime call.

We have noticed over the last several years, response rates have been declining for consumer polls. Generally, running a survey over a longer period of time will boost these response rates. However, lower response rates do not lead to lower reliability of the data. For example, polls with a sample size of 1,200 respondents run over a two-day period with response rates of 3%-4% have been acceptable to use for public release.

The survey's margin of error is the largest 95% confidence interval for any estimated proportion based on the total sample – the one around 50%. The overall margin of error is  $\pm 3.5\%$ . This means that in 95 of every 100 samples drawn using the same methodology, estimated proportions based on the entire sample will be no more than 3.5 percentage points away from their true values in the population.

It is critical to note that the MSE is higher when considering the number of respondents for a given demographic subgroup. For example, the MSE for a subgroup of 150 respondents is  $\pm 8.0$  percentage points.

Question wording, ordering, and other practical difficulties when conducting surveys – in addition to sampling error – may introduce error or bias into the findings of public opinion research.

***Call Dispositions and Response Rates***

Full dispositions for all sampled landline and cell phone numbers are located below.

<b>New Mexico Call Dispositions</b>

## ***Weighting Procedures and Analysis***

Weighting is generally used in survey analysis to compensate for sample designs and patterns of non-response that might bias results. In this study, the sample demographics were balanced to population parameters. The sample was balanced to reflect the targeted population representation by Age, Gender, Race, and Education. The weighted and unweighted results are available on request.

Weighting targets are imposed for sex, age, ethnicity, and level of education for the state of New Mexico. Gender and ethnicity were based on Census Bureau figures from Table 4b of “Voting and Registration in the Election of November 2008 – Detailed Tables.”<sup>1</sup>

Table 4c of the above cited report describes the age distributions, but these do not match our questionnaire coding scheme for respondent’s age. We calculated age distributions from date-of-birth information on file from the state’s respective registered voter database, as supplied by Aristotle International.

Level of education is based on voting-age population distributions as reported by the Census Bureau, American Community Survey, 2006-2008 three-year estimates. We adjusted college graduate weighting targets for the state where required based on the 2008 Census figures on registered voters (Table 5 of the above cited report), noting that the percentage of college graduates is higher for registered voters compared with all adults (32.1% vs. 27.5%, respectively).

## About the Author

Paul DiPerna (paul@edchoice.org) is Research Director for The Friedman Foundation for Educational Choice in Indianapolis. DiPerna joined the Foundation in September 2006, and his research includes surveys and polling on K-12 education issues. He also manages and edits all other research projects commissioned by the Foundation. DiPerna previously served as assistant director for the Brown Center on Education Policy at the Brookings Institution, working there for more than six years. He was a research analyst for the first five issues of the *Brown Center Report on American Education* (2000-2004), and managed the activities of the National Working Commission on Choice in K-12 Education (2001-2005). DiPerna has presented research at the American Sociological Association annual meeting, and he has published articles in *The Huffington Post*, *Washington Examiner*, *First Monday*, and *Education Next*. In 2008, he authored a textbook chapter in the *Handbook of Research on Web Log Analysis*. A native of Pittsburgh, DiPerna attended the University of Dayton as an undergraduate and received an M.A. in political science from the University of Illinois.

## Acknowledgements

Paul DiPerna would like to thank a number of people who provided invaluable time, comments, and assistance throughout the course of this survey project. This would not have been possible without the opportunities provided by Robert Enlow, Leslie Hiner, and Carey Folco. Jeff Reed provided critical input at various stages of this project. Our release partners at the Hispanic Council for Reform and Educational Options, Julio Fuentes and Albert Collazo, gave us invaluable insights and feedback at the local/state level. In addition, we would like to thank Scott Jensen of the Alliance for School Choice for his contributions. In New Mexico, Paul Gessing of the Rio Grande Foundation provided local and state support. We would also like to thank the team at Braun Research who assisted in project development, and for their excellent work in conducting the interviews and collecting the data. We appreciate the time and commitments from Paul Braun, Dave Oshman, Natalie Meade, Shayne Poole, Elaine Karnes, and Rich Kuchinsky. We are grateful to the citizens of New Mexico, who generously agreed to participate in our survey interviews.

## **About the Survey Organization**

### **Braun Research, Inc. (BRI)**

The Braun Research network of companies, founded in 1995, combined employ 60 full-time and over 600 part-time employees engaged in data collection via telephone, and internet for various survey research firms, government and advertising agencies, local community organizations, local and national business groups, foundations, universities and academic entities, as well as religious organizations. In 15 years, Braun Research has conducted more than 7,000 research projects by telephone, internet, and mail worldwide.

Nationally-known research firms have hired Braun Research, including the Gallup Organization, the Pew Research Center, the Eagleton Poll, Mathematica Policy Research, and the *Washington Post*. Braun Research has worked for the New Jersey Department of Health and Human Services, as well as other government agencies including the United States Departments of the Treasury and Defense, and the Center for Disease Control.

Braun Research is a well-respected firm employing techniques and standards approved by various survey research academic organizations and other affiliations including those with whom Braun is an active member, including AAPOR (American Association for Public Opinion Research) and MRA/CMOR (Market Research Association/Council on Marketing and Opinion Research) and CASRO (Council on American Survey Research Organizations).

Braun's services on behalf of other research firms are up to standards required by various professional associations where Braun enjoys membership, and in some cases, participates actively. Paul Braun is a member of the MRA/CMOR committees on response rate improvement and in launching a seal of quality for the industry. Paul Braun is recognized as a leader in the field by colleagues who asked him to serve on these committees. He has served as President of the New Jersey Chapter of AAPOR.

## **About the Survey Sponsor**

### **The Friedman Foundation for Educational Choice**

The Friedman Foundation for Educational Choice is a 501(c)(3) nonprofit and nonpartisan organization, solely dedicated to advancing Milton and Rose Friedman's vision of school choice for all children. First established as the Milton and Rose D. Friedman Foundation in 1996, the Foundation continues to promote school choice as the most effective and equitable way to improve the quality of K-12 education in America. The Foundation is dedicated to research, education, and outreach on the vital issues and implications related to choice and competition in K-12 education.

#### ***Commitment to Methods & Transparency***

The Friedman Foundation for Educational Choice is committed to research that adheres to high scientific standards, and matters of methodology and transparency are taken seriously at all levels of our organization. We are dedicated to providing high-quality information in a transparent and efficient manner.

All individuals have opinions, and many organizations (like our own) have specific missions or philosophical orientations. Scientific methods, if used correctly and followed closely in well-designed studies, should neutralize these opinions and orientations. Research rules and methods minimize bias. We believe rigorous procedural rules of science prevent a researcher's motives, and an organization's particular orientation, from pre-determining results. If research adheres to proper scientific and methodological standards, its findings can be relied upon no matter who has conducted it. If rules and methods are neither specified nor followed, then the biases of the researcher or an organization may become relevant, because a lack of rigor opens the door for those biases to affect the results.

Our authors take responsibility for research design, analysis, charts, and any unintentional errors or misrepresentations. They welcome any and all questions related to methods and findings.

## **About the Survey Co-Sponsor**

### **Hispanic Council for Reform and Educational Options**

Hispanic CREO's mission is to improve educational outcomes for Hispanic children by empowering families through parental choice in education.

## **About the Survey Release Partners**

### **Alliance for School Choice**

The Alliance for School Choice is a national school choice leader, investing in states with the greatest potential for enacting or expanding high-quality, accountable school choice programs. We provide policy and program expertise, implementation strategies and guidance, promote and defend school choice programs, and build local infrastructure for long-term growth, impact, and sustainability. In collaboration with national and state allies, we work to create opportunities for systemic and sustainable educational reform that puts parents in charge, gives low-income families expanded opportunities, and improves educational outcomes for participating children.

### **Rio Grande Foundation**

The Rio Grande Foundation is a research institute dedicated to increasing liberty and prosperity for all of New Mexico's citizens. We do this by informing New Mexicans of the importance of individual freedom, limited government, and economic opportunity.

## **New Mexico K-12 Survey Questionnaire & Topline Results**

<b>Interview Dates:</b>	September 12 to September 18, 2011
<b>Sample Frame:</b>	Registered Voters
<b>Sample Sizes:</b>	NEW MEXICO=808
<b>Split Sample Sizes:</b>	“Split A”=388; “Split B”=420
<b>Margin of Error:</b>	± 3.5 percentage points for the statewide sample ± 5.0 percentage points for “Split A” sample ± 4.8 percentage points for “Split B” sample

*Displayed numbers in tables are percentages, unless otherwise noted.*

*Due to rounding, percentage totals for a given question may be slightly greater or less than 100%.*

---

### **[INTRODUCTION]**

Hello, I am \_\_\_\_\_ calling for Braun Research Inc. in Princeton, New Jersey. We are conducting a telephone opinion survey and would like to know your opinions on some important issues. We are not selling anything or asking for donations. May I please speak to someone who is registered to vote and is at home right now?

#### **[IF ASKED FOR TIME:]**

The survey should take approximately 8 to 10 minutes.

#### **[IF ASKED FOR SPONSOR:]**

The Friedman Foundation for Educational Choice is the sponsor of this survey.

**“For this brief interview, if you are completely unsure about your answer or have no feelings for an answer, you can say ‘I Don’t Know’.” [ENTER AS “DK”]**

1. How much attention do you pay to issues involving K-12 education?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	A Lot	Some	Very Little	None	DK/Ref (VOL.)
<b>NEW MEXICO</b>	<b>40</b>	<b>38</b>	<b>13</b>	<b>9</b>	<b>&lt; 1</b>

2. Do you feel things in New Mexico's K-12 public education system are generally going in the right direction, or do you feel things have generally gotten off on the wrong track?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	<b>Right Direction</b>	<b>Wrong Track</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>34</b>	<b>52</b>	<b>14</b>

3. How would you rate New Mexico's public school system?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	Excellent	Good	Fair	Poor	DK/Ref (VOL.)
<b>NEW MEXICO</b>	<b>6</b>	<b>25</b>	<b>40</b>	<b>25</b>	<b>3</b>

4. How much do you think is currently spent on each student in New Mexico's public schools? Your estimate (to the nearest thousand dollars) will represent the combined expenditures of local, state, and federal governments.

**[OPEN-END. BASED ON RESPONSE, SELECT ONE OF THE FOLLOWING CATEGORIES]**

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	Less than \$4,000	\$4,001 – \$8,000	\$8,001 – \$12,000	\$12,001 – \$16,000	Over \$16,000	DK/Ref (VOL.)
<b>NEW MEXICO</b>	<b>31</b>	<b>26</b>	<b>13</b>	<b>3</b>	<b>4</b>	<b>23</b>

5. **(Split A)** Do you believe that public school funding in New Mexico is at a level that is:

**[ROTATE “TOO HIGH” AND “TOO LOW”]**

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	Too High	About Right	Too Low	DK/Ref (VOL.)
NEW MEXICO	8	22	62	7

5. **(Split B)** According to the most recent information available, in New Mexico \$9,648 is being spent each year per student attending public schools. Do you believe that public school funding in New Mexico is at a level that is:

**[ROTATE “TOO HIGH” AND “TOO LOW”]**

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	Too High	About Right	Too Low	DK/Ref (VOL.)
NEW MEXICO	17	37	41	6

6. If it were your decision and you could select any type of school, what type of school would you select in order to obtain the best education for your child?

[RANDOMIZE RESPONSES TO AVOID BIAS]

[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]

	<b>Charter School</b>	<b>Homeschool</b>	<b>Private School</b>	<b>Regular Public School</b>	<b>Virtual School</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>15</b>	<b>9</b>	<b>36</b>	<b>37</b>	<b>0</b>	<b>3</b>

7. What is the most important **characteristic** or **attribute** that would cause you to choose a **[INSERT SCHOOL TYPE FROM PREVIOUS QUESTION]** for your child? Please use one word, or a very short phrase.

**[OPEN-END. IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

**Top 20 | Specific impressions offered by respondents in the statewide sample. Numbers represent counts (n), not percentages.**

**“For the remainder of this interview, if you are completely unsure about your answer or have no feelings for an answer, feel free to say “I Don’t Know”.” [ENTER AS “DK”]**

8. How familiar are you with “charter schools” in K-12 education?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Very Familiar</b>	<b>Somewhat Familiar</b>	<b>Not That Familiar</b>	<b>I Have Never Heard of “Charter Schools”</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>12</b>	<b>32</b>	<b>39</b>	<b>15</b>	<b>2</b>

9. Charter schools are public schools that have more control over their own budget, staff, and curriculum, and are exempt from many existing public school regulations. In general, do you favor or oppose charter schools?  
**[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>31</b>	<b>41</b>	<b>10</b>	<b>8</b>	<b>11</b>

10. How familiar are you with “virtual schools” in K-12 education? These schools are sometimes called "cyber schools" and "online schools".

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Very Familiar</b>	<b>Somewhat Familiar</b>	<b>Not That Familiar</b>	<b>I Have Never Heard of “Virtual Schools”</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>7</b>	<b>21</b>	<b>38</b>	<b>33</b>	<b>1</b>

11. Virtual schools can be run publicly or privately, allowing students to work with their curriculum and teachers over the internet – in combination with, or in place of, traditional classroom learning. In general, do you favor or oppose virtual schools? **[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>11</b>	<b>26</b>	<b>24</b>	<b>26</b>	<b>13</b>

12. **(Split A)** Some states give tax credits to individuals and businesses if they contribute money to nonprofit organizations that distribute private school scholarships. This policy supports a “tax-credit scholarship system”. In general, do you favor or oppose a tax-credit scholarship system? **[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>23</b>	<b>39</b>	<b>11</b>	<b>15</b>	<b>13</b>

12. **(Split B)** A “tax credit” allows an individual or business to reduce the final amount of a tax owed to government. Some states give tax credits to individuals and businesses if they contribute money to nonprofit organizations that distribute private school scholarships. A “tax-credit scholarship system” allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. In general, do you favor or oppose a tax-credit scholarship system? **[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>39</b>	<b>32</b>	<b>9</b>	<b>8</b>	<b>12</b>

13. A proposal has been made that would establish a tax-credit scholarship system for students with special needs, who currently participate in a special education program. In general, do you favor or oppose this kind of proposal?  
**[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[OPEN-END. IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>48</b>	<b>29</b>	<b>9</b>	<b>6</b>	<b>8</b>

14. An "education savings account" allows parents to withdraw their child from a public district or charter school, and receive a payment into an government-authorized savings account with restricted, but multiple uses. Parents can then use these funds to pay for private school tuition, virtual education programs, private tutoring or saving for future college expenses. In general, do you favor or oppose this kind of "savings account system"?  
**[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS "DK"]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>31</b>	<b>26</b>	<b>14</b>	<b>21</b>	<b>9</b>

15. How familiar are you with “school vouchers” in K-12 education?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Very Familiar</b>	<b>Somewhat Familiar</b>	<b>Not That Familiar</b>	<b>I Have Never Heard of “School Vouchers”</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>10</b>	<b>30</b>	<b>31</b>	<b>29</b>	<b>1</b>

16. A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools.

If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a “school voucher” to pay partial or full tuition for their child’s school. In general, do you favor or oppose a school voucher system? **[PROBE:]** Would you say strongly or somewhat favor/oppose?

**[IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

	<b>Strongly Favor</b>	<b>Somewhat Favor</b>	<b>Somewhat Oppose</b>	<b>Strongly Oppose</b>	<b>DK/Ref (VOL.)</b>
<b>NEW MEXICO</b>	<b>35</b>	<b>27</b>	<b>11</b>	<b>20</b>	<b>7</b>

17. What is the most important **reason** that would cause you to choose your previous response relating to school vouchers? Please use one word, or a very short phrase.

**[OPEN-END. IF DEPENDS, PROBE ONCE. IF STILL DEPENDS, ENTER AS “DK”]**

**Top 16 | Specific impressions offered by respondents in the statewide sample. Numbers represent counts (n), not percentages.**
