## Poll: Robust Majorities of Hamilton County Voters Support School Vouchers, Charter Schools

INDIANAPOLIS – Voters in Hamilton County favor school vouchers and charter schools, and prefer a broad range of options when it comes to educating their children, according to countywide survey data recently released by the Indianapolis-based Foundation for Educational Choice.

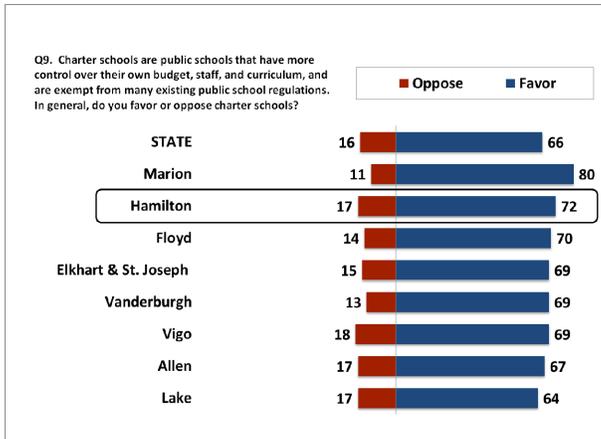

The public opinion findings—emerging from the Foundation’s “Indiana K-12 & School Choice Survey” project—also reveal that Hamilton County voters are unaware of how much is spent in public schools; most respondents substantially underestimated per-student spending.

### *Highlights of the Hamilton County survey results:*

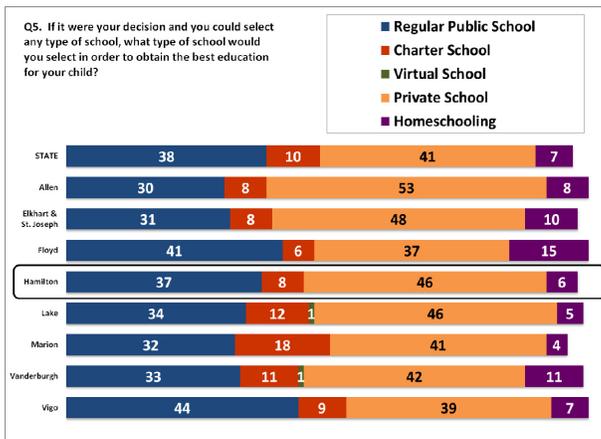

- ▶ There is strong support for school vouchers in Hamilton County. In the county sample, a very large gap exists between those who favor school vouchers (62%) and those who oppose school vouchers (27%) – equal to 35 percentage points.

- ▶ Hamilton County voters are also more likely to favor charter schools (72%), rather than oppose such schools (17%). The gap between those who favor and those who oppose is 55 percentage points.

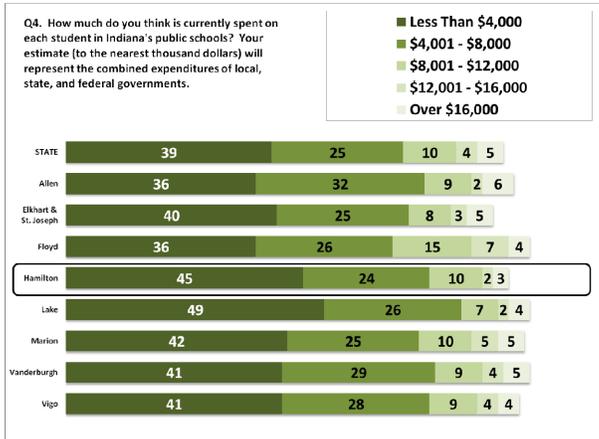

- ▶ When asked for a preferred school type, there is a stark disconnect between Hamilton County voters' first choices and actual school enrollment patterns. About 14% of Hamilton's K-12 student population attends private schools, but in the survey, 46% of voters would select a private school as their first option. Nearly 86% of the county's students attend regular public schools, but a much lower percentage of voters (37%) would choose a regular public school as their first choice. Less than 1% of the county's student population are going to public charter schools, but 8% of Hamilton voters would like to send their child to a charter school. Another 6% of voters find homeschooling the most attractive option.

- ▶ Hamilton County voters are under-informed with regard to how much is spent in the public schools. Nearly seven out of ten respondents (69%) underestimate per-student spending in the public schools. According to financial information the state provided the U.S. Department of Education for the 2007-2008 school year, total per-student spending on average was \$8,867 to \$10,164, depending on the spending definition used by the U.S. Department of Education. More than four out of 10 voters (45%) thought the correct

range was less than \$4,000 per student. Another 24% of voters said it was in the \$4,001-\$8,000 spending range. There is a clear lack of awareness and understanding about how much money is spent to educate students in Indiana. Only 10% identified the correct spending range.

“The data imply a big disconnect between Hoosiers’ schooling preferences and actual school enrollments,” said Paul DiPerna, Research Director for the Foundation for Educational Choice. “Based on these survey results, there is little doubt that Hamilton County voters support school vouchers and charter schools. Those who ‘strongly favor’ outnumber those who ‘strongly oppose’ by 3-to-1 on the school voucher question, and by nearly 4-to-1 on the charter school question. There is a lot more positive intensity for both of these school choice policies.”

These findings come from a Braun Research, Inc. poll conducted for the Foundation for Educational Choice from November 12-17, 2010. For the survey, a statistically representative, randomly selected sample of 351 registered voters across Hamilton County was interviewed by Braun Research via live telephone interviewing on landlines and cell phones. Statistical results were weighted to correct known demographic discrepancies. The margin of sampling error for the Hamilton County sample of interviews is  $\pm 5.4$  percentage points. Nationally-known research firms have hired Braun Research, including the Gallup Organization, the Pew Research Center, the Eagleton Poll, Mathematica Policy Research, and the *Washington Post*.

### *About the Foundation for Educational Choice*

The Foundation for Educational Choice is a 501(c)(3) nonprofit and nonpartisan organization, solely dedicated to advancing Milton and Rose Friedman’s vision of school choice for all children. First established as the Milton and Rose D. Friedman Foundation in 1996, the Foundation continues to promote school choice as the most effective and equitable way to improve the quality of K-12 education in America. The Foundation is dedicated to research, education, and outreach on the vital issues and implications related to choice and competition in K-12 education.
